

characteristics of the product and prior scope determinations on combination units strongly supports the conclusion that the KCU is within the scope of the order.

The physical characteristics of CMI's Kitchen Coach Unit are predominantly those of a color television receiver. The KCU is referred to as a color television in both the promotional literature and CMI's submittal of September 10, 1997. As in the case of Gold Star Combination TV/VCR and TV/Radio units from Korea, it can be used solely as a television, while its other function—the compact disk portion—cannot be used without the television portion of this combination unit. Thus, the ultimate purchasers of the KCU would expect it to function as a color television. Furthermore, the fact that the KCU includes other features does not necessarily remove it from the color television category. Although we recognize that the KCU may be marketed through different channels of trade, the totality of our findings yields substantial record evidence in support of our conclusion.

Recommendation

For the above reasons, we recommend that the KCU be included within the scope of the order on color television receivers from Taiwan.
